Motor solutions for surgical applications

Orthopedic power tools
Powered ENT, neuro and spine drills
Surgical robotics

Motor solutions for surgical applications

Since 2003, Electromag has been developing high-speed ultra-quiet brushless DC motors for critical healthcare applications.

For surgical applications, Electromag offers a range of sterilizable 16, 22 and 30 mm solutions integrating a patented coil technology that provides a higher torque density than conventional motors. Electromag motors feature a distinctive balancing process and a slotless design that eliminates cogging. The result: virtually no noise and vibrations for higher precision and user comfort.

All motors are customizable allowing optimal integration.

Features

- Sterilizable BLDC motors
- Highest torque density thanks to a patented coil technology
- Available with or without Hall sensors
- Electrical interface using lead wires or pins
- Cannulated or plain shafts
- Customizable interfaces and magnetic circuit

16 MM SHORT MOTOR

16 MM LONG MOTOR

22 MM MOTOR

30 MM MOTOR

Solutions overview

Notes

- Please contact us for the complete motor data sheet
- Other configurations available upon request
- Specifications are subject to change without prior notice
- *Continuous values are obtained using a heat sink that reduces the motor thermal resistance by 50% (typical case) Continuous operation is possible up until the maximum winding temperature has been reached. Beyond this point, intermittent operation or additional cooling should be considered

Who we are

Electromag SA is a leading expert in the development and manufacturing of brushless DC motors for demanding healthcare applications up to 300 W. One of the hallmark features of Electromag motors is their quietness and low vibration level for speeds up to 100,000 rpm. Renowned for their reliability, Electromag motors offer up to 92% efficiency. Based in Switzerland, Electromag is the preferred motor supplier of leading global medical device manufacturers in the fields of ventilation, surgery and dentistry.

Key figures:

- Company founded in 2003
- More than 2 million motors sold
- Over 200 models developed
- ISO9001 and ISO13485 certified
- Over 30 employees
